The Zone Improvement Plan (ZIP), as it was known, made it easier to identify where a letter needed to go, which in turn simplified the delivery process for postal employees. If you're in a particular hurry for your mail to arrive at its destination, you can find the latter part of a ZIP code using the tool on the U.S. Postal Service's website above (as well as many similar sites) so long as you know the address of the location you're looking for. At the time, the postal service was looking for ways to simplify the way it did business due to so many employees having left to serve in the war effort. As the number of people and cities grew, more numbers were added. The first denoted a major city (as well as many smaller cities and towns were only added later) while the second denoted the state that city was in. Initially, the Zone Improvement Plan used two-digit numbers. Maybe you're trying to mail a letter but only have the recipient's street address. However, looking up a ZIP code doesn't even have to be as complicated as that. Similarly, you can enter in an unknown ZIP code and find out the city it corresponds to. By including those extra four digits, you help the U.S. Postal Service sort the mail more efficiently and speed up the delivery of your letter or package. There are many situations where you can find yourself needing to look up a ZIP code. When you use the USPS lookup tool at Tools.USPS.com, you'll also get the ZIP + 4 code along with the five-digit code. Finally, the 14 places the letter's destination in Manhattan's West Village. For instance, zero stands for the Northeast, while nine represents much of the west. Whatever your reasons for needing to do so, finding a ZIP code isn't hard if you know where to look. What Is a ZIP Code? ZIP codes were first introduced in the United States during World War II in 1943. Today, the first digit represents a large area. While it's true that they're essential, they serve a purpose. The postal service needed simplification, as a large number of staff left the service. The two zeros mean regional post office is New York Sectional Center. First number says address is in Delaware, Pennsylvania or New York. There are many other online tools, such as those from Zip-Codes.com and United States ZipCodes.org, that have a similar function. If you are typing a general street name, you will receive all ZIP + 4 code ranges along the road or area. A simple search on Google or other large search engines risks the location is linked to a postcode and vice versa. With the Internet, however, find the postal codes is easy. Photo Courtesy: Joe SOHM / Visions of America You can use a tool on the United States Postal Service website to search for a specific address or city prefix particular. In fact, this is also true of telephone area codes. How to find a ZIP + 4 Code you, probably postal codes with an additional four-number number at the end, but it may not be clear there's that actually do it after all, the post seems to get where it has to go regardless of whether these numbers are there or not.
