If any one of the ink tanks or ink cartridges is not installed, an error occurs and you cannot perform printing. When any one of the colours of ink has run out, you need to replace the ink tank or ink cartridge. For this reason, the number of sheets that can be printed with the first ink tanks is fewer than the succeeding ink tanks. When the printer performs cleaning, a small amount of ink is consumed. Depending on your model, we may ask you to replace it with a new one, or one with

almost the same performance as a maintenance service. In this case, it may be that you cannot use supplies or accessories for your model or the compatible OS will be changed. Regarding a solution to a problem caused by using nongenuine ink cartridges including ones supplemented with nongenuine ink by making a hole in the cartridge or so, a fee will be charged even within the warranty term. Keep this in your mind when you use nongenuine ink. If you use nongenuine ink cartridges including ones supplemented with nongenuine ink by making a hole in the cartridge or so, they may have a negative effect on the performance of the printer or the printing quality may be reduced. In addition, though it is a rare case and does not present a safety hazard, it is reported that a print head will become heated or smoke will be emitted from it due to an ingredient not contained in genuine Canon ink.

Note that this does not apply to all nongenuine ink. Depending on your terminal, such as a computer or a smartphone, or the operating system of your terminal, such as your computer or smartphone, the information or the message related to the estimated remaining capacity of the maintenance cartridge usage displayed on the screen of your terminal may be different from the information or message displayed on the operation panel of the printer. Also, the message for the estimated remaining capacity of the maintenance cartridge usage may be displayed at a different point in time. Canon recommends that you use the information and message displayed on the operation panel of the printer as your reference. Precision Color Distribution Technology Unlike other systems, nozzle configuration in Bubble Jet printers is simple, so it is easier to make them smaller and more dense. Using its superior semiconductor manufacturing technology, Canon has succeeded in developing an ultrahighprecision, multinozzle print head. The problem of color inconsistency has been solved by positioning a mirrorimage line of 128 nozzles 600 dpi pitch for each color at a halfpitch offset from the existing line. Amelia 5.0 out of 5 stars After my frustrations with a Lexmark printer thats another review, I looked for a printer with good reviews. I decided to try this out. PROS 1. It looks stylish, with twotone grey and shiny black. The front cover is really neat, you can close it to make space on your computer desk, and when something prints out, it opens automatically. 2. It was packed very well.

Yes it did have lots of packing foam and it was taped everywhere, but I would rather see it secured like this than open a brand new box and find that things are broken like an HP printer that Id bought previous to this. 3. I love the fax feature where it scans all your documents all at once, stores it in memory, and transmits them from memory. Faxing speed is very satisfactory. 4. I love being able to

scan and fax things with a choice of using the glass or the automatic document feeder. The glass is for copying and scanning things like books, cards, and other thick items. The ADF is for multidocument scanning, faxing and copying. This dual feature was a must for me. 5. It has two blank sheet compartments, in the back and in a tray in the bottom. I store blank white paper in the back and photo paper in the bottom. Very handy. 6. Ink usage is excellent. Compared to HP and Lexmark printers which went through ink like crazy, this was much better. 7. Quality of photos is comparable to a dedicated photo printer. Ive printed out photos that looked really really good. 8. Ok, this printer is quiet. Sometimes Im not sure its printing out but then I look inside and see the printout. And its fast. CONS 1. It doesnt have wireless capabilities but then I dont need it. Someone out there might need it, though. 2. It doesnt have a memory card reader. At least, not my unit. Newer models might so make sure to check. I do a great deal of printing. I was a big HP fan for years, but after bad experiences with my last two HPs, I was looking for something new. Some of the good reviews below helped me decide on this Canon. Some people complained about the size, but this is smaller than the other all-in-ones Ive had. Im actually quite happy with the size and the looks of this machine. Were very pleased with its performance thus far. Its a quick printer and doesnt use excessive amounts of ink. Having separate cartridges for the different colors is great.

Im finding that I have to change the larger of the two black cartridges, 3e, more often. So if you print a lot, be sure to keep more of that one around. After several months of fairly heavy printing, thats the only cartridge Ive had to replace. However, note that I am not printing photos with it. I have a Canon Pixma ip6000D for that another great printer. It does a noticeably better job on photos than this MP780. If you plan to print a lot of photos, you are better off with Canons photo printers like the Pixma ip6000D. It has several photo ink cartridges that the 780 doesnt have and that does make a difference in the results. The MP780 makes quick, good quality copies. My only complaint is that I am finding copies come out lighter than on my old HP. If you copy receipts, I would darken the exposure or you may find they are too light to read. Canon needs to work on that. I am pleased with the scanner it does a very nice job of scanning photos and I do a lot of that. The color red scans true, and thats always a good test for a scanner. I have not used the fax feature on this, so I cannot speak to that I already had a separate fax machine and didnt really need that feature. All in all, a very nice all-in-one for the home office. Im a big fan of Canon products. Several years back I bought a Canon Canoscan 3000F flatbed scanner that does legal size and slides and have been well pleased with it. I also have a Canon Elan EOS 35mm camera love it!! I have been very pleased with the quality and reliability of Canons products and their support services. I recommend this all-in-one for home office use. A great value for the money, and Amazon has an excellent price on it. Checking your browser before accessing This process is automatic.
