Thank you for purchasing this Bosch Gas Water Heater. BOSCH 16B Water Heater. BOSCH Tankless Water Heater, Liquid Propane Gas, 940 ES LP See more like this. GAS WATER HEATER Owner' s Guide Robert Bosch Australia Pty. What Other Visitors Have bosch Said. 4 Turning off Press the switch, position. Its a 2 part story, where I first go into detail about my setup before the nest. And the second part will be about installing the Nest. I take no responsibility, consult a professional if youre not comfortable doing the installation yourself. I contacted our plumber and he got to work. I asked him about the Nest thermostat I learned about, but he told me that the Nest wasnt suited, because at the time Nest didnt support modulating boilers and using a Nest would mean my boiler would be energy inefficient. He recommended an Junkers CerapurComfort ZWBR 303 boiler. For reasons he knew best, and I trusted him. And this is what I concluded. The module requires a cabled connection to the internet, I managed to do that, but I can imagine others having their boiler in an unreachable place from the internet router. This was very frustrating for when you wanted to remotely turn on the heating before getting home, only to find out the module stopped working. The app would overwrite days I had already configured. Not save things I had put in, and sometimes take minutes to save. The packages, and URL endpoints led me to the tweekers.net forums, where some dutchies seemed to have did something similar with Nefit boilers. this was my first indication that Nefit and Junkers arent all that different However my euphoria was short lived, because even though Nest supported the OpenTherm protocol, of course my boiler didnt. And I was recommended the new Junkers CT100 smartthermostat. Fuelling my suspicion that these brands arent all that different, all Bosch companies, with another name in different countries. Nobody knows, no documentation about that anywhere. I wanted to remove all doubt.

In this part I will guide you step by step through the setup and This is completely separate from the REST module 1. Create a. Crisis and consequences Even the group of companies run by industrialist Hugo Junkers slid into insolvency in the spring of 1932. Junkers had patented a completely new type of natural gasfired water heater in 1894 and was also a technological pioneer in the building of aircraft and aircraft engines. Faced with a difficult situation, Junkers sold his heating appliances operations to Bosch in November 1932 and thus saved his businesses. Type plate of a Junkers water heater, 1932 Another string and balance By taking over the gas appliance operations of Junkers in Dessau, Bosch added another string to its bow besides automotive equipment. This made the company less dependent on the automotive industry and helped to strike a better balance for the company by introducing new fields of business. Sales crashes in the automotive industry in 1925 and 1926 had shown Bosch the risk of a onesided focus. "Warm and cozy" was the slogan Bosch used to promote the products of the newly acquired division Under the leadership of Bosch, Junkers also manufactured room heating systems in addition to water heaters. New start to the west, partnership with Buderus Bosch Junkers heating system, 1965 After the second world war, Bosch transferred the production of water heaters to Stuttgart and, in 1953, to a newly acquired manufacturing site in nearby Wernau. The Bosch Thermotechnology division was born. Its major technological achievements include the combi boiler for hot water and heating 1968, and energysaving condensing technology 1985. This division grew considerably with the takeover of Buderus AG in Wetzlar in 2003 and is now a leading European manufacturer of energyefficient heating products and hotwater solutions. Since 1998 I have been at Bosch.
