Registration number 01844007 England and Wales VAT registered number GB108311845 Can you help us answering this brief survey.

It will not take you more than a minute. Thank you. Most of us tend to glance through the manual when we first get our spanking new machine and experiment a little with the settings, then end up picking a couple of settings to stick with forevermore. All the different buttons, symbols and timings might seem daunting, but it's worthwhile to know how to make the most out of your washer dryer to save you time, energy, money and also, wouldnt you want to take the best care of your clothes You can also use this function to wash out stains, just be sure to first try removing the stain while it's fresh by dabbing it with a bit of soap water before popping it in the wash. It pretty much guarantees that you'll never have to wash any laundry by hand ever again. To keep things simple, here are 5 easy to remember categories Cottons Standard washing programme for textiles made of cotton or linen EasyCare For textiles made of synthetic materials or blended fabrics Mixed Load For washing natural and synthetic textiles together in a single load HygieneCare Pretreat dry laundry by hot air followed by a low temperature washing cycle to achieve the most hygienic wash results for nondelicate fabrics. Drum Clean To maintain the hygiene of the washer drum and remove residual lint. Materials such as wool or silk may be on the nono list, but its good to check the labels and make a mental note of items that cant go in the dryer. There are two different types of drying programmes Gentle and Intensive so pick the one that suits your needs. Regular cotton items or lighter clothing would be more appropriate for a Gentle Dry, while towels and sheets would be better suited for Intensive Dry. Now that you know all that your washer dryer can do, I bet you can't wait to try out a new setting with your next load of laundry! As a general rule of thumb, always follow the temperature and wash programme selection instructions on the care label to keep your clothes in tiptop condition.

Used it twice since arrival and really, really pleased with the results. Husband had to go into utility room just to if it was switched on and couldn't believe how quiet it was. Tried it on the Easy Care 60 degree wash for our bedding and it took 1 hour 45 minutes. Spin speed on this cycle is 1200 and the sheets were quite dry. When I used the quick wash at 60 degrees it was still going 7 hours later yes 7 hours. That's the reason I changed machines. So can really recommend this Bosch although it is still early days. Sometimes it takes all day to dry things as it keeps switching off and I've gone out so it sits there half dry. I feel conned. Awful tumbler. Been running them without a problem for 5 years. Faultless I have tried every button combination I can to try and switch this off or tone it down, without success. Others are being driven mad too, just take a look on Youtube for all the videos showing how to turn the beeping off unfortunately none for this model. I'd really like to get my hands around the throat of the engineer who designed this machine. Really, whose idea was it. Cmon Bosch, listen to your customers and switch this off! It has now stopped working just outside of the warranty so I will have to either pay Bosch a fortune to repair it or buy a third one. Well I won't be buying another Bosch. As we had been without a washing machine for over a week already and were collecting a large selection of washing we cancelled the order. It seems rather odd that you can lose an order and then suddenly find it again. This being the case I cannot review the product as it was never received.

Send a Houzz Gift Card. Its a Bosch WAS2016UC. I downloaded the manual from Bosch but still cant figure it out. Does anyone know where is for what I think the middle one is for fabric softener. Also, can you use liquid bleach. And, if so, where does that go In my search for this information Ive been really horrified to read about all the negatives experiences with this washer due to mold and smell. I am really hoping for the best here. Im kind of at my wits end. Thanks to all for any info. They are NOT made to be drilled through to mount them. Youre just asking for leakage and possible damage to your floor, subfloor, walls and cabinetry. Maybe those solutions without much drip area management are for people rinsing in ultrahot water in dry climates. Like many of the comments above, our remodel will have a large sink to allow an insink drying rack that will solve the problem of where water will drain. It seems to me that the cabinet dry racks or oncounter mats will still have a problem of dripped water unless the items are partially towel dried prior to racking. Its actually a great idea to boost speed of drying to partially towel dry items before they finish up airdrying, and Ill be including a multibar towel rack near my kitchen to allow for more wet towel airing, which is an entirely separate topic with threads at Houzz devoted to it, where to put your wet towels. However, predrying also takes more time, and sometimes youd like to just place the wet items out and move on to your next task. I appreciated the comment of the person whose care for several children pressed minutes out of the day for extra work, and Im in the situation of caring for a paralyzed family member which has a similar effect. In some life phases, if you can save seconds or minutes on tasks, it snowballs into felt aid by the end of the day.

Everyone has different processes, but at my house we enjoy saving a little on energy costs by running the dishwasher for smaller items that benefit from being sanitized and handwashing large pots and storage containers as you do. We use lukewarm water for washing and rinsing in the sink, and many of our storage containers have crevices that cant be dried even if towels were to be used, so airdrying can take up to 24 hours due to those factors plus our humid climate. The rollup racks pictured in several comments above could also be used. Havens used to make sinks for Rachielle and offers a bit better pricing with their own products now., and Havens quality is outstanding with a lifetime warranty. Another thought would not to take the wall down but to make a pass through so that you can see into the other room but use the original walkways. What say you. See More what to do about my shower Q Comments 18 Thanks for all the input. Can't change layout now. The washer dryer are in a different area mud room so a non issue. Yes we have bought the tub. We changed the sizes the shower and vanity. Vanity will be 70 inches free standing. The entry to the shower is at the end of the vanity with no pony wall. There will be a glass from top to bottom to separate from commode. All are great ideas thanks see pic for changes I've asked for. The last pic is the new master and bath. Why I asked for the "barn door" is I don't want to waste the space for a full door.

The door will be either a mirrored door or the last picture..See More mskathyny Original Author 8 years ago Thank you so much, dadoes!! You saved the day for me. I assume you dont use bleach. Or only powdered bleach in the II compartment Have a lovely, clean, holiday! Where is this How do I do this Oh, I guess Im just supposed to figure it out via trial and error. Also, dont use cheap fabric softener and then as little as possible. Do believe Ecover is plant based.

I picked it up on the fly at the health food because the fragrance was OK. Pinky, Id love you to try it and get your opinion. Will send you some. I think it gives great results. Its my new first choice. This video was actually pretty helpful its an an 8 minute demo on both the Bosch Axxis washer and dryer I actually thought you put the washing liquid in the right compartment, not the left despite dadoes comment, so the video was great to watch and get clarification. Thanks all, and thanks to mskathyny for the question clearly not a dumb one after all! Helps prevent detergent residue build up. Best to check the instruction manual to confirm which. Majority of manufacturers have them available at their web site via model number search. I let it run with no clothes and let it mix with the water for about 20 seconds and then add clothes. If so, does pod go in the far left compartment. Thumbs down and no thank you I just bought a second hand Bosch Maxx from my sister and is my first front loader. I agree with Terry re symbols instead of words to show what to do. Nuts! So it goes, Prewash, main wash and Bleach. What detergents are prewash. I pour softner im the 3rd compartment as it goes straoght into the washer. Usually dont bother with the middle or II compartment. Any specific help. I also pour bleach in the 3rs compartment or mix with the 1st compartment. I Use MELLALUCA products and love them.
