

The cycle will end automatically after the spin cycle, unless NO FINAL SPIN has been selected. If NO FINAL SPIN was selected, refer to page 12 for information on how to end the cycle and enable opening of the door.

To use these settings for starching:

1. Place the washing to be starched into the washer. The washing should not have been treated with fabric softener.
2. Dissolve sufficient starch for 4 gallons (15 litres) of water (being sure to observe the starch manufacturer's instructions) in a quart (1 litre) of water.
3. Depress the "ON/OFF" button.
4. Set the cycle selector to RINSE/SPIN (11) or SOFT RINSE/SPIN (10).
5. Set the spin speed selector to a specific speed, or INTERVAL SPIN, or NO FINAL SPIN.
6. Depress the "START" button. The indicator light for "Rinse/Spin" in the cycle progress indicator will become illuminated and the time of the cycle will appear in the "Cycle Countdown" alphanumeric display.
7. When the water begins to flow into the washer, pull out the dispenser drawer slightly and pour the starch solution into the prewash compartment (compartment marked "P" on the right).
8. Close the dispenser drawer. The cycle will end automatically after the spin cycle, unless NO FINAL SPIN has been selected. If NO FINAL SPIN was selected, refer to page 12 for information on how to end the cycle and enable opening of the door.

Soft Spin (8) & Spin (9)

These setting selections are used to spin individual items of laundry. The SOFT SPIN (8) is performed at a lower speed for permanent press and delicate items. Maximum spin speeds of different cycles and for INTERVAL SPIN setting are shown in Table 3, page 11.

7. Soak

The Soak setting is used to pre-treat heavily stained items:

1. Only items of the same color should be soaked in a single load.
2. Pour the soaking agent into Prewash compartment (compartment "P", on the right).
3. Depress the "ON/OFF" button.
4. Set the cycle selector to 7 SOAK.
5. Depress the "START" button. The indicator light for Washing in the cycle progress indicator will become illuminated.

The Soak cycle lasts 2 hours. All the water is pumped out, without a spin. The clothes remain wet. A rinse cycle can be selected to remove the soak water from the wash. You may, as well, without soaked clothes being rinsed first, select desired wash cycle.

6 Drain

The DRAIN setting is used to pump water out of the washer, without spinning, for example after the NO FINAL SPIN selection has ended the cycle.
