the secure and cost effective availability of cash when and where people need it. It has been tested and found to comply with the limits for a Class A or Class B computing device pursuant to Subpart J of Part 15 of FCC Rules which are designed to provide reasonable protection against such interference in a residential installation. Coins are sorted and counted at a rate of up to 6,000 coins per minute depending on the coin mix. Both the denomination and quantity totals are registered on the Operator Control Module located on the front of the Sorter. Options are included when the Sorter is shipped or are also available separately, complete with installation instructions, for installation at a later date. A. MAGNET Attaches to Inspection Pan to prevent unwanted metallic objects from entering the Sorting Area. Carton Inner Liner THE SORTER WEIGHS APPROXIMATELY 200 POUNDS. All Sorter functions are controlled here. Each component and function key is identified in the figure below. A complete description of each Key, Icon and Display Screen is included on the following pages. Printer Optional Paper Advance Display. UPPER ICON SELECT Changes the Display Screen as determined by the UPPER ICON CHOICE Key. LOWER ICON DIRECT SELECT HOME SCREEN Identify totals by route, product, etc. This Display can be BAG COUNT in units or dollars, as selected by the operator, but will be the same as the bagstop selection. It is displayed in MOTOR RUN the upper right corner of the SYMBOL HOME SCREEN. This icon represents the Display used to set the number of BAGSTOP coins per bag, displayed in units or dollar value, as determined. DOWN When the highlight cycles ARROW past the last item, it will revert to the top of the list. This icon moves the highlighted selection choice directly above the.

This icon allows the operator to choose additional display NEXT NEXT PAGE plays of the current information. This icon represents Notes CURRENCY currency It is also the screen to which you return to from all other screens. The HOME SCREEN displays the Batch total of all entries, a MOTOR RUN SYMBOL and all ICONS necessary to operate the Sorter. Note If the bagstop quantity is to be changed, make the change before pressing the MOTOR key. Instructions for changing the bagstop quantity are described later in this guide. Each screen will display 20 ID Totals in sequential order. View additional totals using the NEXT PAGE Icon Key. Each screen will display 20 ID Totals in sequential order. View additional totals using the NEXT PAGE Icon Key. 100.00 1100.00 200.00. Enter the amount using the Numeric Keypad and press the ENTER Key. The amount will show on the display, and be entered into the Batch Total. The amount entered may be in units or dollars, depending on the option selected in the Programming mode when the Sorter is installed. Press the NEXT PAGE Icon Key to view the current Batch Coin Summary Screen. Press the PRIOR PAGE Icon Key to view the BATCH HEADER SUMMARY Screen. Press the NEXT PAGE Icon Key to view the BATCH NOTE CURRENCY SUMMARY Screen. Press the NEXT PAGE Icon Key to view the current SUB COIN SUMMARY Screen. Press the PRIOR PAGE Icon Key to view the SUB HEADER SUMMARY Screen. Press the NEXT PAGE Icon Key to view the SUB NOTE CURRENCY SUMMARY Screen. Press the NEXT PAGE Icon Key to view the current GRAND COIN SUMMARY Screen. Press the PRIOR PAGE Icon Key to view the GRAND HEADER SUMMARY Screen. Press the NEXT PAGE Icon Key to view the GRAND NOTE CURRENCY SUMMARY Screen. Press the PRIOR PAGE Icon Key to view the GRAND COIN SUMMARY Screen. Both total and individual bag counts are displayed. Individual bag counts may be added to or cleared in this screen. It should be at the "HOME" position showing "BATCH TOTAL" and "00" . 3.

<https://skazkina.com/ru/3ware-7506-4lp-manual>

Place the coins for the first batch in the Inspection Pan and remove any unwanted objects. Instructions for proper printer operation are discussed in the Programming Section later in this Guide. 7. The total batch amount for the coins sorted will appear on the HOME SCREEN. Sub Icon Upper Icon Choice Key BATCH GRAND BATCH TOTAL SELECT SELECT Upper Icon Select Key. Grand Icon Upper Icon Choice Key BATCH GRAND BATCH TOTAL SELECT SELECT Upper Icon Select Key. Upper Icon Choice Key BATCH GRAND BATCH TOTAL. Upper Icon Choice Key BATCH

GRAND. The Display will show the desired Batch, Sub or Grand Note totals and the media total. Upper Icon Choice Key BATCH GRAND BATCH TOTAL SELECT SELECT Upper Icon. Whenever the number of stops equals the number of stops requested, the bagstop screen will be shown after the bagstop has been cleared. This may include ID numbers, bagstop values, media, etc. Note The Sorter can be programmed to require the operator to enter a batch id number batch total cannot be accepted until batch id number is entered. In addition, numbers may be entered as part of the Grand Total identifier. An example of this function is the ability of a vendor to keep track of how much of the total amount came from a particular type of machine. The Batch Total information will print on the audit trail, and transfer to the Sub and Grand Totals. The battery backup feature retains the control memory in the event of a power interruption or loss. These entries may be made before, during or after coin processing, but must be made BEFORE the ACCEPT Key is pressed for that batch. Three options are available This fee is in the form of a percentage of the total. Percentage of Total A. This can be done manually or by connecting a Currency Counter to the appropriate connector at the rear of the Sorter. The Sorter Control Display will remain in the currency mode and show the dollar total for the number of documents counted. VALUE MODE OPERATION 1. Process currency. 2.

<http://www.ladillo.com/images/743-bobcat-manual.pdf>

Note Cannot be in error mode. 2. Process currency. 3. The Model 2800 will read the first notes value, and offsort all other denominations into the Upper Tray. One of several error messages will be displayed. Locate and eliminate the problem and continue operation. If the problem persists, disconnect the Sorter from power and contact your Authorized Service Representative. Press the HOME Key to restart proper key sequence. Disconnect the Sorter from power the battery backup circuitry will protect the coin totals. Install bag at station indicated. Wait for sorting to stop before accepting total. Wait for printing to stop before accepting total. Check all physical connections between Sorter and Peripherals. If all connections are proper, check the port parameters and resume operation. If the problem persists, contact your Authorized Service Representative for assistance. Enter the required ID and reaccept the Batch Total. This icon represents a Remote Batch Display and allows a quick method of programming the Control to output data in the Remote. This icon allows the operator to program the parameters for the four RS232 ports. RS232 INTERFACE These parameters include. Each of the parameters may be changed to fit your specific application. To enter the Programming Mode 1 Turn Key switch to the unlock position. 2 Hold the UPPER ICON SELECT Key down at powerup. Note If a batch, sub or grand total is accepted and the printer has not been initialized, the printer tape may not advance far enough for proper tearoff. Note The Sorter must be in programming mode. To enter the programming mode, perform the steps below. Note If a batch or grand total is accepted and the printer has not been initialized, the printer tape may not advance far enough for proper tearoff. Note The sorter must be in programming mode. To enter the programming mode, perform the steps below.

<https://kunstkasteel.com/images/741mp-samsung-manual.pdf>

Note Pressing the next page and prior page icon keys allows the operator to cycle between the 3 basic programming screens. 1. It contains a header, fixed and variable fields. DISABLE Choose this option when no coins are expected to be sorted at this particular station. These choices are explained below 1. No ID is required and all print functions operate normally. ID's can still be used and tracked through the Sub and Grand Audit Trail by using the format described in number 2, below. If either Fuse becomes inoperative, the Sorter will stop. Caution Disconnect Sorter from power before examining or replacing fuses. Always replace the fuse with the correct size and type for continued circuit protection. Clean the outside with a soft cloth and a mild soap. NEVER use alcohol, Ketone, or any harsh chemicals on the outside surfaces. Should a Coin Bag become overfilled,

stop the Sorting Motor. The likely causes for this condition are a. Incorrect Bagstop setting for size of Coin Bag. b. Our policy is to continually improve products. All Technical Support Documentation User Guides, Maintenance Manuals, Individual Instruction Sheets, etc., are continually monitored. This product is yet another step to fulfilling our mission To enable the secure and cost effective availability of cash when and where people need it. Box 200 705 S. 12th Street Model types Watertown, WI 53094 USA Telephone 920 262 3300 6950000 6950999 230V Coins are sorted and counted at a rate of up to 3,000 dimes per minute depending on the coin mix. The denomination and quantity totals are registered. Sorting Speed.Up to 3000 Coins per Minute depending on coin mix Operating Temperature Range. In some applications, not every Sorting Station would be used. The Coin Drawers for these Stations may be secured in position, if desired, by a single screw inserted in the bottom of the Drawer through the Baseplate. Toggles between ON and OFF. BATCH Displays the current Batch Total.

Repeated key depressions will display the Batch Total for each denomination. The exception to this rule is the "GRAND CLEAR ACCEPT" sequence, in which case the GRAND is cleared after the ACCEPT Key is pressed. If a Printer is connected, the output is sent to the Printer. The CLEAR function is used to remove information from memory. 1. Clear Batch Total a. Press the BATCH Key displays batch total. b. If quantities are changed during coin processing, it is important that the number of coins currently in the coin bag must be less than the new bagstop quantity. Each Station's coin value unit count if nonvalued coin and three selectable bagstop amounts are programmed at the time of manufacture. The values can be altered for your particular application. This will aid in proper selection of bagstop quantities and will be helpful in the event reprogramming becomes necessary. Station No. Quantity Quantity Showing Coin Value A Motor Run SYMBOL Symbol located in the upper left corner of the Display, will appear while the Sorter Motor is running. CLEAN Disconnect the Sorter from power, locate and clean the dirty Sensor, reconnect the.25 SENSOR Sorter to power and resume operation. Note When the Clean Sensor Error has been corrected, the coin quantity for that station should be rerun to verify its accuracy. Wait for sorting to stop before accepting total. NO ACCEPT WHILE COUNTING 8. PRINTER BUSY Totals cannot be accepted while Printer is operating. Each of the parameters may be changed to fit your specific application. Refer to the following section for these instructions. To enter the Programming Mode 1 turn Keyswitch to vertical, 2 hold Batch Key down at powerup.Note The Sorter must be in programming mode. To enter the programming mode, perform the steps below. Note The Sorter must be in programming mode. To enter the programming mode, perform the steps below. Turn the Keyswitch to horizontal, then back to vertical to exit the programming mode.
