Keystone Motorsports 5.0 out of 5 stars When I got a new 00 Pathfinder to use as a mud truck, I needed to install a new marine radio after the factory Bose unit died after getting hit with 3000psi of water when I was cleaning out the interior with the pressure washer. This kit is not only sturdy as hell, but instructions are clear and cutting it to fit is a breeze with a regular hacksaw blade. Would not hesitate to install another Metra kit in anything.Only issue was that the instructions said to cut off a bunch of brackets on my application and I did not cut them as completely as I needed too so had to make sure to fully cut off and sand down the bracket locations to fit it properly. My stereo deck is a single din but the removable screen is double din size and this was perfect.However, it required an extreme amount of modification that exceeds the extremely lackluster instructions guidance. The instructions only said to cut two pieces. By the time I was done trimming and shaving plastic pieces off, there was only two mounting points of the original dozen or so left for my configuration. Overall I give this product 2 stars because the instructions were exceedingly vague.<https://www.funinminneapolis.com/pics/epson-stylus-pro-9450-manual.xml>

- **99-7417 manual.**

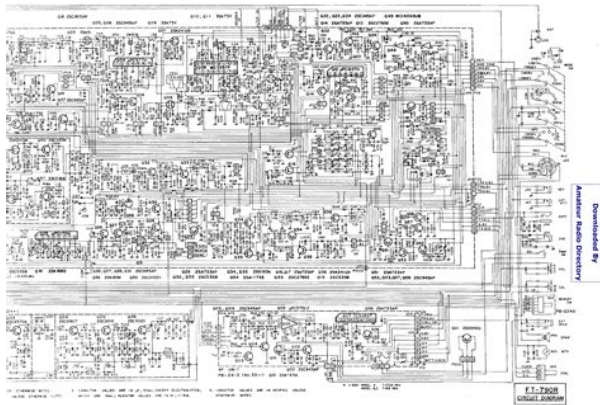

I seriously doubt this company even put this mount in an 04 frontier at any point if their instructions provide any indication. The product works as I need it to, but it took me a few hours of trial and error to figure out how to install it as the instructions were nearly useless. To get it to fit into the cavity left behind by the previous radio, you have to cut a ton of stuff off says that on the instructions, too. And even then, there's huge ugly gaps on both sides of the radio. It wasn't sturdy, and no amount of rigging would get it to work. I had to send the original radio back and get a refund, but I can't get a refund on this since you have to cut pieces off. Unless someone on here specifically says it worked for their model of car, don't trust the instructions. It works fine, but there was a lot of cutting to do to make it fit. If you plan on using this for my year and model of car, make sure you have a Dremel tool, or it will be a real headache. It seemed like such a waste throwing away a bag full of plastic because it just wasn't needed. As far as the kit goes it worked great for a 2003 Nissan Xterra. It fits nicely and the added pocket under the deck is a real bonus. Follow the directions or look at the pictures and you won't have a problem installing your new deck with this installation kit. I say well because it has two holes about 1cm x 1cm in the storage compartment for some strange reason. You can see it very slightly in the pictures provided. I suggest tape the holes up or cover them in some way so you won't lose anything important. It helped to have a Dremel tool to cut off the extra unneeded tabs, but after that it was simple. Highly recommend for anyone who needs a stereo upgrade! I must say though that the directions could be improved. There are hundreds of different configurations and it can be confusing with all the interchangeable parts and tabs which need to get broken off. DASH KITNDK717 Single DIN Installation Dash Kit.This dash kit allows you to replace your vehicles factory stereo to improve the overall sound quality of your car audio system. It has been designed with high quality automotive grade ABS plastic to match the texture of your factory dash. Installation of this kit is simple. No special tools are required and the included stepbystep instructions will guide you through the install. WIRE HARNESS NWH702 Wiring Harness.

<https://www.ilsipariobari.com/images/canon-powershot-a720-is-manuale-italiano.pdf>

When replacing your factory radio with an aftermarket car stereo, a wire harness is a must for a quick installation. It eliminates cutting your OE radio plug helping to maintain your cars value. After

connecting it, your install is simple as the wires will colormatch and easily connect to the aftermarket stereo. Without a wiring harness you will have to cut the factory harness and then test each wire to connect to your radio. RADIO ANTENNA ADAPTERNM9 Radio Antenna Adapter. Dont be left without a radio when you install your new stereo. When replacing your factory radio with an aftermarket car stereo, many cars need an adapter that will plug into factory antenna cable. This adapter will make the installation very easy. CUSTOMIZATIONChoose your free air freshener assorted colors NOTE Locate your vehicle in the application guide. Crossreference your vehicles make and model to determine which installation parts are required to complete your car stereo installation. The installation parts consist of a Dash Kit, Wire Harness and in some cases an Antenna Adapter is also required.This dash kit will work with standard single DIN stereos. Nissan. Follow the directions or look at the pictures and you wont have a problem installing your new deck with this installation kit.I say well because it has two holes about 1cmx1cm in the storage compartment for some strange reason. You can see it very slightly in the pictures provided. I suggest tape the holes up or cover them in some way so you wont lose anything important.It helped to have a Dremel tool to cut off the extra unneeded tabs, but after that it was simple. Highly recommend for anyone who needs a stereo upgrade!Once you narrow down the parts to your specific applications its a very smooth install. The finished product has a factory look and I would highly recomend this product. I read a couple of reviews that complained about having to remove a couple of mounting

tabs, but I just used wire cutters and trimmed with a razor knife for a smooth fit. Had to do some cutting with the dremel to properly install. That means you'll feel guilty about throwing away more plastic as you keep. But the directions were surprisingly accurate, and this was the only one available for the year model. The bezel doesn't fit on my 97 Mercury Villager same as 97 Nissan Quest. I put the Clarion units plate over it, but just barely. To resolve a bit of the metal box showing, I put electrical tape over that edge and then put the plastic plate back on. Considering how difficult it would be to retro something to fit my vehicle, they did a good job. In this year model, the plastic kit entirely replaces the metal radio box that is in the dash from factory. Not great, but functional. No real complaints on functionality. We have over 15 years of experience in Home and Car audio, electronics and accessories. We specialize in quality, variety and competitive pricing for all of your Home and Car Audio needs. We are an authorized dealer of a variety of brands such as Teac, Metra, Boss Audio, Crimestopper, DLS, Earthquake Sound and many more. Returns are processed within 45 business days.

Most out of stock items are coming back in stock within 12 weeks. This is a digital media receiver which means it does not have a CD player built into it. Not to worry though. Who really uses CD's these days. Instead you get Bluetooth streaming, a USB input, an SD card slot, and a front aux input. Our SD slot has a max capacity of 32GB. Other receiver usually only support up to 8GB. We spent some extra money manufacturing this with an upgraded amplifier. It is 50x4 watts peak and 17x4 watts RMS. The amplifier built into this receiver is almost the exact same as the leading brands on the market. This receiver also has a 3 band equalizer built in with adjustable EQ curves rock, pop, flat, etc. No gaps can be seen, and all installations using these kits will look great! Cheaper brands offer wires that are nearly impossible to install because the length is too short. This makes a secure connection between the terminals and the connectors. Our company is the culmination of years of development involving a team of dreamers, engineers, and designers. Proudly conceived and developed in the USA, Rockville manufactures highend gear for professional audio, car stereo, marine audio, and home theater. You must have JavaScript enabled in your browser to utilize the functionality of this website. Lifetime Warranty Made with the highest quality and precision out of any other brand Car specific CD Player removal and installation instructions included.

**ADVANTAGES OF METRA TURBOWIRES GXSL** Type of wire used in Metra Turbowires provides more flexibility, handles more power than cheaper wire kits so your speakers get all the power without any leaking out. TurboWires are heat resistant so they will last a lifetime. Turbowires are 7 inches in length so they are easy to install. Cheaper brands offer wires that are nearly impossible to install because the length is too short.

Precision hand assembled terminals are pressure sensitive, and do not break easily like the cheaper ones. The ends of the turbowires are prestripped so installation is quick and easy. High quality plastic connectors always fit perfectly. OEM Quality terminals. This makes a secure connection between the terminals and the connectors. Lifetime Warranty Made with the highest quality and precision out of any other brand. Color coded wires matches aftermarket radios for an easy install. Allows easy installation of aftermarket radio without needing to cut and splice wires. Included is installation instructions! You can simply remove the item from your cart. You have no obligation to purchase the product once you know the price. You can simply remove the item from your cart. Email or through phone at 888 9446222. Only the purchase price of the product is refundable. This is to avoid returns. Failure to comply with our Terms and Conditions may lead to UNAPPROVED RETURNS.
